All items are sandblasted in our home studio, by my husband and myself. We make our stencils by hand, using a special photo-emulsion process, and we mask each glass individually.

The etched designs are permanent, and the glasses are sturdy and dishwasher-safe. Each item is initialed on the bottom or back.

Most of the artwork we use is from my own original drawings. We've just started working with other artists, and the Robo-Dino design is our first collaboration between ourselves and Mary Kelly of Lollytots (<http://lollytots.etsy.com>)

All of our items come with paper slips that tell a short story about our business and our process. If you'd prefer to have more discreet sticker labels on the bottoms of products instead of a colorful paper slip, just let us know!

We're constantly updating our policies and available products, so please download our latest order form before placing your order.
